## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 5-9, and 11-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 14-15, "A device" fails to limit the scope of the invention which causes the claims vague and indefinite, "there being arranged in the beam path" is considered as awkward language without the recitation of any element of the invention, "the pulse laser light source" fails to provide any clear antecedent basis and structural limitation which is considered as the invention. The recitation of "at least one beam splitter" fails to define the element with other elements which is considered as the invention. Further, the recitation of the "whereby ..." limitation fails to define any positive element which is considered as the invention. The claims further recite "at least one partial beam is produced rear via reflecting components" which fail to define any reflecting components or elements in connection with the beam splitter in order to confirm the elements of the invention. The limitation of "Kepler telescope" is not clearly defined in the claims. The claims further recite "wherein" limitation which fails to clearly define any elements considered as the invention.

The claim language is couched in such a way that they fail to comply with 35 USC 112 2<sup>nd</sup> paragraph. Claims are an apparent literal translation from foreign application which fails to comply with 35 USC 112 2<sup>nd</sup> paragraph of the U.S. standard.

Art Unit: 2828

The remain claims are depended on the above rejected claim 1; therefore they are also rejected.
